

Abdelrahman Ibrahim

Front-end Developer

SUMMARY

I am a Computer Science student with a strong passion for technology, programming, and software development, especially in the fields of Front-End Development and Computer vision. Alongside my technical background, I have a deep interest in education and sharing knowledge, especially with younger generations.

Languages: HTML, CSS, JavaScript, C++, Python

Technologies: Vue.js, Tailwind CSS, Bootstrap

EDUCATION

2022 - 2027 **Bachelor of Computer Science Engineering CSE** Aswan universty

PROJECTS

- Vue 3, TailwindCSS **Personal portfolio** [GitHub Repo](#) | [Live demo](#)
A modern personal portfolio showcasing my projects, technical skills, and a brief overview about me. Designed with a clean and responsive layout to highlight my work and experience effectively.
- Vue 3, TailwindCSS **NileVista** [GitHub Repo](#) | [Live demo](#)
Landing page for an Egyptian tourism company featuring smooth scrolling, immersive hero section, destination highlights, client testimonials, and responsive design.
- Vue.js, TailwindCSS **Pinterest clone** [GitHub Repo](#) | [Live demo](#)
A Pinterest homepage clone made using Tailwindcss & Vue js. Implemented a responsive grid layout, hover effects, and a clean modern UI inspired by the original platform.
- HTML, CSS, JS **E-commerce sneakers page** [GitHub Repo](#) | [Live demo](#)
Built a responsive product page with an interactive lightbox gallery, image switcher, and add-to-cart functionality. Focused on clean UI, DOM manipulation, hover effects, and responsive design.
